

**From:** SPENCER, WILLIAM J GS-14 USAF AFMC AFSVC/SVOF <william.spencer.2@us.af.mil>  
**Subject:** HOT! ACTION: COVID-19 Information for AF Food and Beverage Operations Update 4

Leaders,

While we understand the HPCON level can change at each installation based on events in that area, we applauded those that have taken our recommendations to implement more stringent action in attempts to prevent viral spread. Please see attached for Enhanced Sanitation Practices and Recommended Actions for Food Establishments just provided by Public Health. Prior guidance was based off of industry practices and guidance received by our business partners and industry subject matter experts and information being provided to the general populace and being implemented outside military channels.

Based on the current world events we still highly recommend installations implement carryout/curbside pickup only in both DFACs and NAF activities. In addition take serious consideration into closing NAF activities based on usage and to eliminate the gathering of personnel.

Please continue to track all funding spent on additional operational requirements/items ISO COVID-19 and work with local Finance Office on disbursement/reimbursement under ESP Code C1. Also, continue to track new guidance released concerning COVID-19 on the AFSVC Portal  
<https://cs2.eis.af.mil/sites/10042/Pages/HR/COVID19.aspx>.

We thank you for your expedient implementation of guidance we send to the field and our team is standing by to support where we can.

v/r
